Icon Button

Icon Button allow users to take actions, and make choices, with a single tap.

Default

Design Implementation

Icon Button

```
ElevatedButtonIcon(
  onPressed: () {},
  backgroundColor:
AppColors.green,
  icon: const
Icon(Icons.add),
  tooltip: 'Add',
),
```

Change the button type, for example `ElevatedButtonIcon` and `OutlinedButtonIcon`. If you want to use an icon button without a background color, you can use `IconButton`.

Icon Close Button

Design Implementation

Icon Close Button

```
IconButton(
  onPressed: () {},
  icon: const
Icon(Icons.add),
),
```

```
IconCloseButton(
  onPressed: ()
{},
),
```

> **Info**
>
> `IconCloseButton` is usually used for Dialog.
